REPORT DASHBOARD OF CHALLENGES FACED BY FARMERS IN 4 COMMUNITIES IN GIWA LGA KADUNA

Access to agricultural extension services

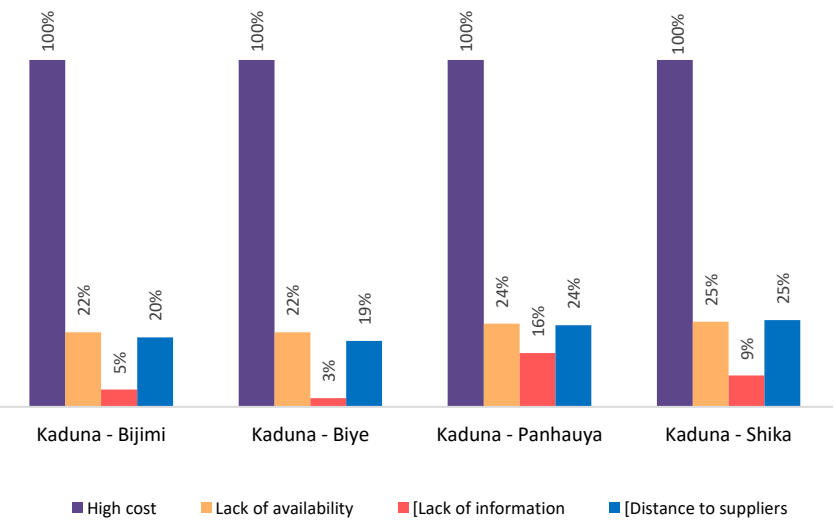

Count of finance for farming activities

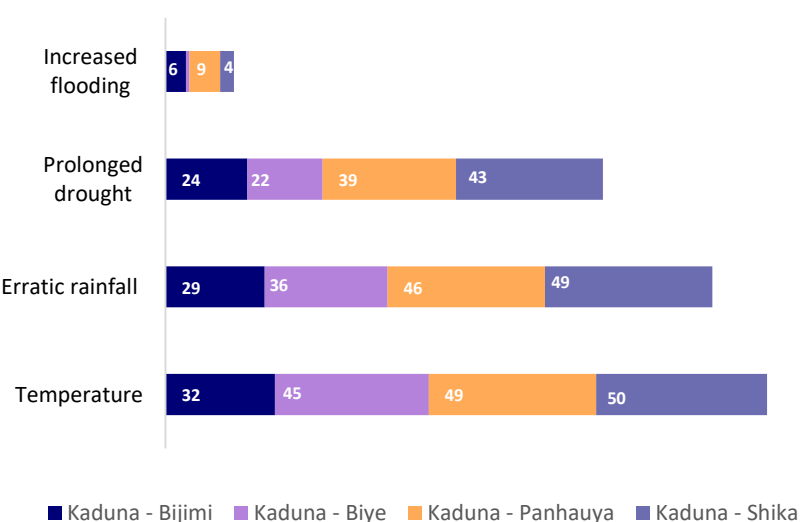

Means of sale of produce & livestock

Distribution of challenges to Access to farm inputs across LGAs

Distribution of changes observed in weather patterns over the past years

Brief Insights

An overwhelming 95% of farmers in the region are facing challenges of access to training, modern techniques, pests, poor seeds, financial services, insecurity, quality inputs, and the ability to adapt to climate changes.

Recommendations

Addressing these issues through **targeted policies, modern farming techniques, improved access to resources, improved seeds, liaising with NGO's and granting low interest loans**, and enhanced training programs will be critical in improving agricultural productivity and resilience in these communities, this way farmers will be better equipped to overcome the challenges they face and contribute to the overall development of the agricultural sector.
